VOTE NOW FOR A BETTER FUTURE

Maybe you've just turned 18. Maybe you've been of age for a couple of years now. Or maybe you are still too young to vote. No matter your age, this message is for YOU. Gen Z, this is one of the first elections where we can make a difference in the world we live in. Our generation brings a whole new perspective to the table, one that the people before us or after us won't have. You are the first teenagers or young adults to survive a quarantine for 6+ months. You are the first to fight for an app that enhances your freedom of speech and allows you to spread your wisdom and creativity. We are a powerful force to be reckoned with, which is why our votes may be the most important this year. Not only are we fighting for our current state to improve, we are fighting for our future to be better than the one we had to grow up in. You may not agree with either of the candidates presented, but you need to vote in order to see change. The president we vote for this time around won't stay forever, but the one who sits in the White House could be a key element into the brighter future we pray for everyday, or its the boulder blocking our way towards progress. That's why you need to get out there and VOTE when your time comes, whether that be this November or years into the future. Every person's vote counts, especially yours. Don't wait for change to come. Be a part of the force that brings change to the present.
